RE: Speedline 73-20 Silicone Caulk LEED information

To whom it may concern:

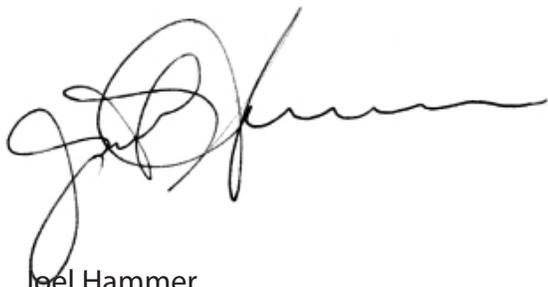

Speedline 73-20 Silicone RTV Industrial Sealant is VOC compliant (29 grams/liter). There is no certification of products for LEED.

LEED is a certification system that deals with the environmental performance of buildings based on overall characteristics of the project.

The project manager needs to record the VOC content of all products used in the building process to determine if the final product is LEED approved and apply for the necessary credit.

Thanks again for your continued business and support!

Yours Truly,

Joel Hammer,
Sales Manager
